Enclosed for your review and approval is Revision 1 of the Project Specific Plan (PSP) for Pre-design of Area 6 Subareas 3 and 4 (Supplement to 20300-PSP-0011). This document was approved by the U.S. Environmental Protection Agency as noted in Reference 1. This document has been revised to incorporate verbal comments received from the Ohio Environmental Protection Agency (OEPA) during a conference call on March 3, 2005 between Donna Bohannon/Kelly Kaletsky and Frank Miller/Rich Abitz, to discuss the aforementioned PSP. As discussed on the same call, no formal comments on Revision 0 will be provided to the U.S. Department of Energy. Therefore, this revision replaces the previously submitted PSP and addresses all of OEPA's verbal comments. The only comment that required a modification to this PSP was related to the sampling of the concrete floor of the Waste Pits Remedial Action Project's (WPRAP) Material Handling Building (MHB) and the concrete pads currently being used as a staging area for pit materials. Further clarification was requested regarding the purpose of sampling the concrete for technetium-99 analysis and subsequent waste acceptance criteria
